JOHN EARL F. MANDAWE

F. Mendoza St. Cambaro, Mandaue City

09542488716 | johnearlmandawe17@gmail.com | https://earl-portfolio-three.vercel.app/

SUMMARY

Full Stack Developer specializing in creating efficient and scalable web applications. Equally comfortable crafting resilient backend services with Spring Boot and Java as building dynamic user interfaces with React. Passionate about writing clean code, leveraging data from relational databases (MySQL, PostgreSQL), and implementing modern technologies to solve real-world problems effectively.

EDUCATION

2022- 2026 **CEBU INSTITUTE OF TECHNOLOGY- UNIVERSITY** **N. Bacalso Ave., Cebu City**

Bachelor of Science in Information Technology

2018 - 2020 **ACADEMIA DE SAN JOSE** **S.B. Cabahug, Mandaue, 6014 Cebu**

STEM *Strand*

PROJECTS

Capstone Project: DriveSafe

- Permanent Digital Archiving: Replaces external cloud links with a secure binary storage vault that stores project documentation directly in a private database, preventing lost academic records.

- Cryptographic Integrity: Computes SHA-256 digital signatures on document uploads to detect and block duplicate or plagiarized project submissions against historical archives.

- Cloud Integration & Authentication: Integrates Google OAuth 2.0 to manage role-based access for students and faculty, centralizing capstone verification, searching, and archiving into a unified dashboard.

INTERNSHIP

INNODATA INC - AI/LLM & SOFTWARE DEVELOPER | - May 2026

- Built dynamic, full-stack analytics dashboards for leadership development programs (L&T, LMS, VILT Tracker, LeadX/BuildX) using **Next.js**, **TypeScript**, **Supabase**, **Tailwind CSS**, and **Recharts**.
- Automated end-to-end data ingestion pipelines for Excel/CSV files, incorporating batch inserts, schema validation, and error recovery for enrollment, attendance, and survey datasets.
- Implemented core platform features including pre/post-assessment comparisons, cohort/individual views, multi-variable filters, full-text participant search, server-side pagination, and PDF/Excel report exports.
- Maintained clean code practices, managed multi-branch feature workflows in Git, and collaborated closely in an Agile engineering team.

TECHNICAL SKILLS

- **Programming & Frameworks:** Java, TypeScript, JavaScript, Python, C, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React, Next.js, Spring Boot, Tailwind CSS, Recharts
- **Backend & Databases:** PostgreSQL, MySQL, Supabase, RESTful APIs
- **Developer Tools & Platforms:** Git, GitHub, Linux, Vercel
- **Core Competencies:** Full-Stack Web Development, Object-Oriented Programming (OOP), Data Ingestion & Validation, Database Schema Design

CERTIFICATIONS

- AWS for Beginners
- Java Programming
- Cloud Architecting
- MySQL
